

DEVASHISH SINGH

Senior Software Engineer (Mobility) • Android & Cross-Platform (Flutter)

+91-9560423869 • devashish.negi45@gmail.com • [LinkedIn](#)

SUMMARY

Mobile Application Developer with 10 years of experience in Android (Kotlin/Java) and cross-platform development (Flutter, Compose Multiplatform). Skilled in technical leadership, architectural decisions, team mentoring, building enterprise applications, optimizing app performance, and delivering scalable mobile solutions across domains like **E-commerce**, **Health**, **Real-Estate** and **MarTech**.

SKILLS

Languages: Kotlin • Java • Dart • HTML • XML

Android: Android SDK • Jetpack Compose • Coroutines • Flow • Ktor • Koin • Dagger-Hilt • Room DB • DataStore • WorkManager • Jetpack Navigation • MVI • Unit Testing (JUnit, Mockito)

Flutter: Flutter SDK • Bloc • Riverpod • MobX • Provider • SQFlite • Hive • GetIt • Platform Integration

Miscellaneous: Rest APIs • GraphQL • Web Sockets • Firebase • Google Map • Push Notifications • Bluetooth/BLE • MVVM • Clean Architecture • Modularization • Payment Gateway integration • Git/GitHub • CI/CD (Github Actions, Fastlane) • App Deployment (Play Store, App Store)

Tools: Android Studio • Xcode • IntelliJ IDEA • VS-Code • Antigravity • Claude

EXPERIENCE

Senior Software Engineer — Android & Flutter | Dew Solutions Pvt. Ltd. | Mar 2022 – Present

↑ *Promoted from Software Engineer · 3-year trajectory · Scope grew from 1 app to 3 product lines*

- Led a team of developers, owned architecture decisions, sprint planning, code quality standards and stakeholder communication.
- Accelerated feature development by 40% by leveraging AI coding assistants (GitHub Copilot, Antigravity) and standardizing team workflows.
- Led performance improvement efforts across multiple Android and Flutter applications, enhancing startup performance, reducing crashes, and increasing overall application reliability.
- Collaborated with cross-functional product and marketing teams for seamless feature delivery.

Software Engineer — Android | Dew Solutions Pvt. Ltd. | Mar 2019 – Mar 2022

- Developed and maintained Android applications in e-commerce and healthcare using Kotlin, MVVM, Coroutines, and StateFlow.
- Improved app performance by optimizing API calls with Retrofit + Coroutines and local caching using Room DB.
- Migrated legacy AsyncTask implementations to WorkManager for reliable background scheduling across all device states.
- Migrated SharedPreferences to DataStore, eliminating main-thread I/O and reducing ANR-related crashes.

Android Developer | DRPU Software Pvt. Ltd. | Jul 2016 – Mar 2019

- Designed, developed, and maintained Android applications using Java, XML, SQLite and RESTful APIs.
- Integrated in-app purchases using Google Play Billing to streamline payment processing and enhance revenue.

KEY PROJECTS

TataNeu (50M+ users) ([Android](#), [iOS](#), [Web](#))

- Shipped MarTech stack — push, in-app notifications and analytics via clean architecture — cutting campaign setup time by 30% and lifting notification CTR by 18%.
- **Integrated third-party MarTech SDKs (MoEngage, Firebase Analytics, Adobe Analytics)** and built event pipelines tracking concurrent user actions — data informed 3 A/B tests that improved session depth by 11%.
- Collaborated with product, analytics, and platform teams to standardize event tracking and campaign delivery workflows, improving data accuracy by 25% and reducing analytics discrepancies.

TataCliq Luxury (10M+ users) ([Android](#))

- Enhanced app architecture by revamping from MVP to MVVM with Jetpack Compose, implemented payment workflows with Coroutines and StateFlow, and established CI/CD pipelines via GitHub Actions, reducing release cycle time by 35% and app crash rate by 5%.
- Worked on major features of the app such as PLP, PDP, Cart, Checkout and SSO.
- Mentored a team of junior developers through structured code reviews and technical training, improving team-wide test coverage from under 20% to 65% over 5 months.

TataCliq Fashion (50M+ users) ([Android](#))

- **Rebuilt core screens in Jetpack Compose** cutting UI render time by 20%.
- Revamped some core features as per MVVM architecture reducing the memory consumption and improved fast app rendering.
- Developed geofencing features using the Fused Location API to enable location-based user engagement campaigns, contributing to a 12% lift in push notification open rates in targeted regions.

ACHIEVEMENTS & AWARDS

- Tech Champion recognition from client for ownership and mentoring for **TataCliq Luxury**.
- Standout Performer certificate for solutioning and delivery excellence for **TataCliq**.
- Appreciation award for project delivery.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science

Sir M. Visvesvaraya Institute of Technology (VTU) · 2015

Diploma — Computer Science

BSF Institute of Technology · 2012
